1	December 11 in the
1	Proceedings
2	THE COURT: Okay. So I have the second group
3	of objectors today; correct? You've sent me some
4	information and some documents by e-mail a couple of days
5	ago; correct?
6	All right. How do you want to present this?
7	Someone has a screen up, so I assume that someone wants
8	to use that screen, unless you're giving it to me as a
9	gift, then I say thank you very much.
10	MR. MOLO: I want to use the screen, your
11	Honor.
12	THE COURT: Okay. So why don't we start with
13	AIG?
14	All right. Go ahead.
15	MR. GOLDSTEIN: Can I speak from, your Honor,
16	here?
17	THE COURT: Where's our podium? I mean, it
18	might be better, if you'd like to, you can use the
19	podium.
20	MR. GOLDSTEIN: Sure. Thank you.
21	And, your Honor, I have some demonstratives
22	which I may refer to, if that's all right.
23	THE COURT: Okay. Good.
24	Let's mark this as a Court exhibit as Defendant
25	AIG's 1.
26	(Whereupon Defendant AIG's Exhibit 1, was marked

and received into evidence by the court reporter.)

MR. GOLDSTEIN: Thank you, your Honor. Jordan Goldstein for AIG and its affiliates.

As we argued in our August 12th submission, your Honor, and in prior submissions, the Standard Intex Method is the most appropriate way to distribute the remaining settlement payment as to the 17 trusts that are still at issue, and that's for four reasons: The first is that it's the most consistent with the structure and intent of the settlement agreement; second, it's the most consistent with the structure and intent of the pooling and servicing agreements; the third, it avoids a absurd and commercially unreasonable result, which is what would occur were Tilden's preferred methods to be followed; and the fourth is it's the most consistent with the expectations of the market participants.

Just to address each of them in turn -- THE COURT: Okay.

MR. GOLDSTEIN: -- the trustee testified in the first Article 77 proceeding before Justice Kapnick that the purpose of the settlement agreement was to ensure that the most senior holders were paid in advance of the more junior holders and the Standard Intex Method assures that.

The second is that the settlement agreement

reflects a paid-first-write-up-second methodology, which obviously, we spent a lot of time on in the earlier parts of this proceeding. The purpose of that paid-first-write-up-second methodology is that money is distributed based upon the pre-distribution balance of the certificates. In other words, if the certificate is entirely written down, it's generally going to get nothing. And to the extent it has a small principal balance, it would only get a very small pro-rata portion. Again, the Standard Intex Method reflects that.

In terms of the pooling and servicing agreements, we've cited a lot of law in our briefs which are -- the main point being that you read agreements as a whole, and you read it contextually and you don't read clauses in isolation. The key purpose of the PSAs, pooling and service agreements, is that the most senior bonds are insulated from losses, and that's through two methods: One is over collateralization. In other words, the underlying collateral exceeds the balance of the certificate; and the second is, to the extent that collateral arose, the most junior certificates take losses first in order to insulate the more senior ones in the capital structure --

THE COURT: So if I went back to those 65 days of hearing that we had on the first settlement on the

settlement agreement, would that be reflected in the transcript of those hearings that the philosophy of the settlement agreement was that senior secured were going to be over collateralized, junior secured were going to take the losses first, which is the way it generally occurs, right? Junior certificate holders take the losses first. And so they may be written up to a hundred percent; correct? And then if there are additional losses, the senior certificate holders take them and payment is the other way; correct?

MR. GOLDSTEIN: Yes.

THE COURT: And is that reflected in the transcript from the settlement agreement, that that was how the parties intended that this settlement be distributed?

MR. GOLDSTEIN: Yes.

Your Honor, on Page 15 of the brief we put in on August 12th, there is a quote from Jason Kravitt, attorney at Mayer Brown, counsel for the trustee, where he says precisely that. And we have a fairly lengthy block quote. I'm not going to read it, but it reflects that principle.

THE COURT: And so does someone who buys, for example, a junior subordinated debt in the market, would that be -- or subordinated bond, I guess it would be,

1	Proceedings
2	would that be the same price as a senior bond? In other
3	words, the value of the junior bond is much less;
4	correct?
5	MR. GOLDSTEIN: Right, right.
6	THE COURT: And that reflects the understanding
7	that it may or may not be that the junior bonds get paid,
8	so, therefore, you can buy them in much more, I guess,
9	cheaply than senior bonds; is that correct?
10	MR. GOLDSTEIN: That's correct.
11	So we don't have visibility on what Tilden and
12	Prosiris paid for their bonds. But our understanding
13	THE COURT: Were Tilden and Prosiris holders of
14	junior bonds at the time of the settlement agreement?
15	MR. GOLDSTEIN: I
16	THE COURT: Or I will ask them.
17	MR. GOLDSTEIN: Perhaps
18	THE COURT: Where are they?
19	MR. MOLO: What was the question?
20	THE COURT: Were you holders of bonds at the
21	time of the settlement agreement?
22	MR. MOLO: Excuse me. I'll find out for sure.
23	(Pause in proceedings.)
24	MR. MOLO: To be clear, at the time that the
25	settlement was presented, we were not, but
26	THE COURT: You were not.

1	Proceedings
2	MR. MOLO: But by the time
3	THE COURT: So you had no by the time the
4	settlement agreement had already been put into place, you
5	bought.
6	MR. MOLO: No. By the time it was final, we
7	had
8	THE COURT: So the testimony
9	MR. MOLO: So it was during the period of time.
10	THE COURT: So the testimony had already
11	occurred when you bought.
12	MR. MOLO: Correct. As is the case
13	THE COURT: So there was no surprise to you
14	that the testimony had occurred when you bought the
15	testimony that we're talking about right now and in front
16	of Judge Kapnick where the scheme was
17	MR. MOLO: Right. We very much bought with
18	purpose.
19	THE COURT: Okay. Good.
20	MR. MOLO: And AIG, by the way, I believe is
21	similar
22	THE COURT: I'm just asking you. I don't want
23	there to be any dispute that you bought in knowing what
24	the deal was.
25	MR. MOLO: Correct, correct.
26	THE COURT: It wasn't what you bought in after

all the testimony explaining how this was supposed to happen.

Okay. Good. Thanks. Okay. Go ahead.
MR. GOLDSTEIN: Sure.

So, as I said, there are four reasons, starting with the settlement agreement, and that's what we just discussed. In terms of the pooling and servicing agreements, the structure of those deals is to protect the most senior holders from losses and Tilden's approach usually flipped that on its head. It has the senior holders receiving less than half of the settlement and has junior holders, including ones that are completely written down, receiving the lion's share of the settlement.

Tilden put in two experts affidavits. What's interesting is that neither of them has any coherent explanation for why the result that Tilden's advocating makes any sense. For example, if the settlement payment, we gave this example in our brief, instead of being paid all next month, for example, were just spaced out over ten months, one ten next month, one ten the month after, one ten the month after that, virtually all of this flows to the super senior holder. It really is this fortuity that all of this would actually come in in a single month, that, under their interpretation, leads to this

leakage to the more junior holders.

And the second point is their experts have not put forward any explanation that this structure was intentional; that the parties to the PSAs ever intended that this would result. In addition, their experts don't contest that the Standard Intex Method most accurately reflects how market participants understood these deals to function.

And, finally, we put in an affidavit from Intex. And, obviously, as your Honor knows, we took discovery from them in order to get to that point. In Intex, that affidavit make very clear that the Standard Intex Method is; A, a default method for all 17 trusts; and, B, for, really, the last all or nearly all of the last five years has been the default method for all of those trusts.

So, again, to your Honor's point, certainly
Prosiris and Tilden would've been aware, at the time they
purchased, it appears, that this is how the market
understood these to function. And I'm happy to answer
any questions about that, your Honor. I'm also happy to
address some of the points in their brief that they put
in on August 26th.

So on --

THE COURT: I guess I have two questions.

MR. GOLDSTEIN: Yes.

Vanessa Miller Senior Court Reporter

THE COURT: One is that I know I spoke with

Justice Friedman weeks ago about her decision that she

recently made. And I wanted to ask you whether you

thought there was anything in Justice Friedman's decision

that is relevant here. I've read it a couple of times,

but, I mean, it's not quite the same issue. It's more an

issue of whether or not the settlement was, I guess,

similar to an arbitrary and capricious type of --

MR. GOLDSTEIN: Right.

THE COURT: But is there anything in that decision that you want to point out here?

MR. GOLDSTEIN: Yes, your Honor.

So the Gibbs & Brun law firm, on behalf of their holders, put in a submission, but I think the key point that they highlighted was on this record date argument. So Tilden and Prosiris were basically arguing that if there is a payment that occurs subsequent to the Court entering judgment, that the trustee should, essentially, relate -- should pay it based upon the principal balances as they existed in February 2016.

So the key point, key response to this -- and this is consistent with a portion of the opinion that you just mentioned that Gibbs & Bruns flagged their supplemental submission, which I believe they put in on August 12. It was a little later in the day after we put

in our primary submissions, is, there's nothing in the pooling and servicing agreements that permits payment based upon principal balances or based upon the principal balances other than on the date of which the payment is made. So there's simply nothing in the PSAs that support -- there's no logic that really supports that.

I mean, the settlement agreement was agreed to in June of 2011. There's no reason why February 2016 is some magic date that everything should relate back to. And Tilden and Prosiris have not put in any principal reason for why February 2016 is the relevant date other than, I presume, that they would make more on that date rather than June of 2011.

They do cite the delay that's occurred since
February. I mean, that, quote, unquote, "delay" is
because the trustee filed a verified petition seeking an
instruction from the Court. And Tilden singled out its
14 trust as unique, and that's their word, unique and
deserving of some special treatment. And so we've
litigated that. And so that's the nature of these
things. Tilden also argues that part of the reason
there's been delay is because we sought discovery on
Intex. Now, Tilden actually cites that Intex discovery
in support of its position. And it seems difficult to
come to understand why the Intex discovery is relevant

### Proceedings 1 2 when Tilden cites it, but somehow, irrelevant or dilatory when we cite it. And then, finally, the trustee itself, 3 in prior hearings before your Honor, has said that 4 Tilden's approach would be impractical, and that's the 5 trustee's word. 6 So the J.P. Morgan decision has some references 7 8 to record date issues and so on, and it's consistent with the position that AIG has articulated. 9 10 THE COURT: And the last thing: You brought up 11 that one trust -- Prosiris and Tilden didn't have any 12 interest in one of the trusts? 13 MR. GOLDSTEIN: Right. 14 And I didn't see anything that was THE COURT: 15 inconsistent with that; is that correct? I wrote it 16 down. 17 MR. GOLDSTEIN: There's the CWALT 2007 OA10. 18 THE COURT: Right. I mean, in one of their initial 19 MR. GOLDSTEIN: 20 pleadings, they gave a list --21 THE COURT: Right. But, okay. And so in your 22 pleading, I tagged it. Let me --23 MR. GOLDSTEIN: I don't believe they disputed 24 that point. 25 THE COURT: Is that correct? That you

don't -- one of the AIG trusts, CWALT 207 OA10, Prosiris

26

and Tilden doesn't have an interest in; is that correct,

Counsel?

MR. MOLO: Yes.

THE COURT: So that's going to go. I mean, you can prepare a judgment for that one.

MR. GOLDSTEIN: Okay. Thank you, your Honor.

THE COURT: Because you don't have standing to object to that one; correct?

MR. MOLO: Right.

THE COURT: Okay.

MR. GOLDSTEIN: I'm sorry. I just want to respond quickly to just a couple of points that they mentioned in their August 26 brief.

One of the points they make is that AIG is somehow collaterally estopped from maintaining its present position. And there are three responses to that, your Honor: The first is that our arguments in the initial pleadings that they're citing are the March 4th ones were made in response to the verified petition. The verified petition raised an issue of transitory over collateralization, this idea of whether or not there would be a mid-month calculation of over collateralization that would result in leakage. So our arguments were directly responsive to that. It was not responsive to distribution amount or the 17 trusts. So

we simply did not join issue in those initial pleadings.

Secondly, to the extent there is an overlap, our position has been consistent. It's been that the super senior holders, based upon the structure of the bond, should receive priority and there should not be leakage with the juniors. So there's simply not a conflict.

And the third, in our later submissions, we specifically carved out, at the point that we knew that the 17 bonds were at issue, we responded only to the -- at one point, 515 then it was 512, but we responded to the bulk of the bonds. And we expressly carved out, and then the parties disagreed about these remaining bonds. We're going to deal with them separately. So there really is no collateral estoppel issue, but I just wanted to respond to that.

And, also, they raised a res adjudicata issue. I don't quite see what that would be. We've always agreed that the settlement agreement should be enforced, the question is how to interpret things. But AIG's position, just to be clear, is that the settlement agreement is binding and should be enforced.

THE COURT: No. I don't think that -- I mean, you can argue that, but I didn't argue that with you. I don't think there's any res adjudicata or collateral estoppel here. But I'm happy to hear argument on it, if

2 you want to. I wouldn't focus on it if I were you, okay.

Anything else?

MR. GOLDSTEIN: Just quickly to conclude, your

5 Honor --

THE COURT: Go ahead.

MR. GOLDSTEIN: -- just to go back to your

Honor's question at the beginning: Tilden purchased

these bonds for, it appears, a very small percentage on

the dollar. Presumably this was --

THE COURT: After the settlement.

MR. GOLDSTEIN: After settlement.

THE COURT: And this is going to be my first question to you, Counsel: You were not involved in negotiating, drafting, hearing anything with your clients about the settlement agreement. That's the first question I asked you. You took afterwards, and you took a look at these two documents, and my sense is that you found a little hook, and so now you're arguing something that I don't really think anyone who entered into that settlement agreement ever thought was going to happen. So that is my first discussion with you.

And, frankly, since you weren't around and you didn't have anything at the time of the settlement agreement was put in place, from an overall perspective, that's what it looks like. And so the question then

#### Proceedings 1 2 becomes is your interpretation what the parties, who 3 entered into the settlement agreement, thought was going to happen? Number one; number two, is it commercially 4 5 reasonable to pay junior written-off debt more than 6 senior debt? I mean, these are issues that you really need to focus on. 7 8 MR. MOLO: I look forward --9 THE COURT: I don't see them. 10 MR. MOLO: -- to doing it. And I'm sure you can hear the 11 THE COURT: 12 reason why I'm asking you these questions, because what 13 you are arguing is, in some ways, viscerally counterintuitive. So --14 15 MR. MOLO: I look forward to it. 16 THE COURT: Good. Let's qo. 17 MR. GOLDSTEIN: Thank you, your Honor. 18 MR. SHEEREN: And, your Honor, it might make sense for the remainder of the super seniors to present 19 20 before --21 THE COURT: Does anyone else have any Oh. 22 other arguments that they want to add in? 23 MR. SHEEREN: Yes, your Honor. Just briefly. 24 THE COURT: Sure. Absolutely. 25 I'm sorry. I didn't mean to --26 MR. GOLDSTEIN: No.

26

THE COURT: I didn't mean for you to only take AIG's position.

MR. SHEEREN: Not at all. Not at all. Thank you, your Honor.

David Sheeren on behalf of AEGON and BlackRock, who, like AIG, are super senior holders. Our clients hold in 16 of the 17 trusts, so they hold them broadly.

We join in the arguments you just heard from AIG, but I wanted to make a couple of additional points: The fundamental goal of any contract interpretation has to be the effectuated intent of the parties; that's the And, your Honor, Tilden Park and Prosiris's interpretation isn't just inconsistent with the intent of the parties, the settlement agreement, to the governing document, the PSAs and with respect to prospectus supplements. It's the total opposite. It would flip seniority structure in these trusts. As your Honor pointed out, that is viscerally counterintuitive. only is it counterintuitive, it's just a flawed interpretation of a contract read as a whole. It doesn't make any sense. And the case law in New York says, Look at the commercial reasonableness of the outcome that the parties are advocating. And, here, the outcome is fundamentally unreasonable. And I'm going to walk through a couple of points about that.

24

25

26

And, by the way, the trustee's petition pointed out what should be the obvious point, which is the essential purpose of over collateralization is to insulate the senior from losses. They recognize that. That's obviously front and center of our arguments. to follow the Tilden Park interpretation would be the exact opposite of insulating the seniors from losses. We pointed out in our briefs that the prospectus supplements, which are, by law, incorporated into the parties' contract, and, therefore, form part of the agreement among the parties, those prospectus supplements describe in detail the purpose of subordination and the purpose of over collateralization. And you see exactly the trustee's point that they had central purpose is to insulate the seniors from losses. So that's the purposes of these deals.

We showed in our brief that if you followed Tilden's Park approach, shortly after the settlement payment was made, the seniors are going to suffer tens of millions in losses; that can't be the purpose of these contracts, your Honor. Under the standard commercially reasonable Intex approach, the seniors wouldn't suffer losses for six to eight years in the example we gave in our brief. And on that basis alone, frankly, you can see whose interpretation reasonably effectuates the intent of

the drafters here.

22

23

24

25

26

Second main point, your Honor, is when you read the Tilden Park response, they talk about a cap on principal distribution. There's this cap. They call it It's a cap. That's the sole basis on which they a cap. say tens of millions of dollars should flow to their junior bonds because of this cap. But there's no explanation of the cap in the brief. But as your Honor knows, the cap is this defined termed called the over collateralization target amounts. Tilden Park says, Once you reach the over collateralization target amounts, any marginal dollar on top of that goes to their bonds. Honor, if that was a reasonable basis to allow leakage, you would think their brief would reference the term "over collateralization target amount." When you look at the brief, they don't even talk about it. It's in one of the 120 footnotes. They are running from that term because it doesn't make any sense to cap the principal distributions by that thing called the over collateralization target amount.

And, by the way, over collateralization target amount, it sure sounds like it has something to do with over collateralization, but even Tilden Park, in their prior briefs to the Court, admitted that the settlement payment itself doesn't create over collateralization.

There's no temporary illusory over collateralization;
Tilden Park argued that. And so they're running from
that term because it doesn't make sense to cap
distributions based on the appearance of the over
collateralization target being met. So that's an
important point. And you also see that the expert
reports that they've submitted totally ignore that term.
It doesn't appear in the expert reports because,
candidly, it doesn't make any sense. So what can they
say about it?

So just to close, your Honor, we agree with AIG that the commercially and reasonable outcome here is the payments of the settlement funds in full to the senior-most bonds. And, your Honor, you see the market expectations not only in the Jason Kravitt testimony, who obviously was a key witness at the trial --

THE COURT: I did see it. I read the testimony. Yes.

MR. SHEEREN: But, your Honor, Intex hadn't even created this toggle that would align with Tilden Park's interpretation until 2014. The settlement agreement was posted in June of 2011 and the trial concluded in November of 2013 and we got a trial order shortly thereafter. So they're late to the game. And they clearly have, you know, an opportunistic textural

#### Proceedings 1 2 argument, but it doesn't make any sense. For that reason, we would ask the Court to overrule their 3 objection. 4 5 Thank you. 6 THE COURT: Okay. Thank you, Counsel. Did you want to add to that? 7 8 KLEIN: Your Honor, we are a senior MS. 9 support certificate holder. And we suggest that it's probably best for us to bring up arrears since we are 10 11 advocating for the write up first pay second. 12 MR. MOLO: Yes. It is my screen. 13 THE COURT: And a very nice one it is. 14 Thank you very much. Thank you very MR. MOLO: 15 I hope you'll agree with the contents that you're much. 16 about to see on it. 17 We are here, Judge, seeking to enforce the 18 settlement agreements as written and the PSA as 19 written --20 THE COURT: Well, let me just say this, let's 21 lay this out: You weren't a party to the original proceeding, although AIG, BlackRock and AEGON were. 22 23 MR. MOLO: Correct. 24 THE COURT: So at the time that this settlement agreement was reached, you had no interest in this; you 25

Vanessa Miller Senior Court Reporter

had no idea what the intent of the parties from the

26

1	Proceedings
2	settlement agreement is; you weren't here for the
3	testimony; you didn't hear any of that; correct?
4	MR. MOLO: Right.
5	THE COURT: So I hear from the parties who
6	actually were
7	MR. MOLO: Right.
8	THE COURT: negotiating the settlement
9	agreement, who were part of the settlement agreement, and
10	they tell me this is what everyone intends, that's what I
11	see. And I certainly was not a party to that. But it is
12	clear to me that everyone who was here at the time is
13	taking a different view from you about how this
14	settlement agreement should be read.
15	MR. MOLO: Okay. Well
16	THE COURT: So we start with that.
17	MR. MOLO: Two points of clarification.
18	THE COURT: Yes.
19	MR. MOLO: I don't believe that AIG owned these
20	bonds.
21	THE COURT: Okay. They may not have owned
22	these particular bonds.
23	MR. MOLO: Right. But they were clearly
24	involved. They were at the table.
25	THE COURT: They knew what was going on.
26	Everyone knew what you intended to do and everyone that

1	Proceedings
2	was there, at the time when the settlement agreement was
3	entered into, is telling me exactly the opposite from
4	you, the buyer later, thinks that the settlement
5	agreement
6	MR. MOLO: I, with all due respect, disagree
7	with you
8	THE COURT: Tell me who agrees with you who was
9	there at the time.
10	MR. MOLO: Jason Kravitt.
11	THE COURT: Okay. He was not and he didn't
12	hold any
13	MR. MOLO: No. He was the lead negotiator, as
14	Mr
15	THE COURT: He was not a holder.
16	MR. MOLO: He was the they quote Jason
17	Kravitt in their brief, and I agree with Jason Kravitt.
18	THE COURT: All right.
19	MR. MOLO: I embrace the quotation that he
20	gave.
21	THE COURT: Yes. All right.
22	MR. MOLO: Let me just tell you what he said.
23	This was his testimony: "The tranches who are the most
24	senior who suffered losses get the cash first." That's
25	from their brief. "The tranches who are the most senior
26	who suffered losses get the cash first." And in these

1	Proceedings
2	particular trusts, with the language of these PSAs, those
3	tranches are the tranches that are held, the bonds that
4	are held by Tilden Park and Prosiris.
5	Let me just show you, Judge
6	THE COURT: Okay.
7	MR. MOLO: You know, we're painted as these
8	evil junior bondholders
9	THE COURT: Not evil. Let me say, I don't
10	think you look in fact, I see a halo over your head.
11	MR. MOLO: Thank you very much.
12	THE COURT: But what I am saying is you
13	certainly paid a lot less, a lot less for your interest
14	in this trust than the senior bondholders; correct?
15	MR. MOLO: Well, I
16	THE COURT: And why do you think you paid less?
17	Because you're supposed to get half of the recovery? Do
18	you think that that makes sense?
19	MR. MOLO: Well
20	THE COURT: I mean
21	MR. MOLO: I'd like to explain to you how it
22	does.
23	THE COURT: Okay. Let me see how this does.
24	Yes.
25	MR. MOLO: Okay. So, first, we start with this
26	proposition that we're not the super seniors.

1	Proceedings
2	THE COURT: Correct.
3	MR. MOLO: That's the people here who are on
4	the other side of this table
5	THE COURT: Is that like a super delegate? You
6	can never you have to vote and that's it? You can't
7	change your mind?
8	All right. Yes.
9	MR. MOLO: But what we are are the senior
10	support certificate. We're the second tranche in the
11	debt class. And this is a debt class that as whatever it
12	is, 14, 15 classes up there in this particular
13	securitization. And that's the position that we
14	routinely maintained in these trusts.
15	Now, we're not risky junk bonds
16	THE COURT: Wait a second. Now, let me ask
17	you: You see this list?
18	MR. MOLO: Yes.
19	THE COURT: Is any of the other certificate
20	holders but you making this claim about how the money
21	should be distributed?
22	MR. MOLO: Well, those
23	THE COURT: Yes or no? All those other
24	classes, have any of them put in briefs about how they
25	should the money should be distributed? You're
26	agreeing that this is

MR. LUNDIN: Yes. Our submission, which is very short, makes a couple of points, but, basically,

THE COURT: Which class are you?

MR. LUNDIN: I must confess, your Honor, I don't know the particular tranche. And to anticipate your question, sitting here today, I do not know when my clients purchased their bonds.

THE COURT: Well, then, you weren't here at the time? You, Counsel, were not?

MR. LUNDIN: No. I was not in the proceeding.

THE COURT: Okay. So then you are after settlement, probably prior to when this is --

MR. LUNDIN: I don't know, your Honor. But I can assure you that I certainly had no involvement in the settlement.

THE COURT: Okay. Thank you.

MR. MOLO: Okay. So the point of this chart is to show that we're not at the bottom. In fact, we were very, very senior. And, in fact, these bonds are triple-A rated. And what these bonds had, again, putting these transactions in context, 14 deals, the average value of the deals was a billion dollars. It ranged from 375 million to two-and-a-half billion. You had the five primary securitization underwriters involved in this;

UBS, Deutsche Bank, Barclays, Countrywide, Bank of America. And the three key law firms, Sidley, McKee Nelson, Thacher Proffitt. So these are highly negotiated, sophisticated transactions. And I think your Honor knows, these are not deals where somebody says, Let's go to a securitization deal and then let's go sell bonds. They put these deals together with key bondholders, or the key tranches having negotiated the terms. So no two deals are necessarily alike. Some of them are alike.

And the reason I showed you this is we're not talking about this being like a Sidley Austin form or a Thacher, Proffitt form or a UBS form. These are all different deals with these key players all involved and they have this language --

THE COURT: So what I suspect is that all these bonds are out there and you're buying bonds only because now your PSAs have an interesting twist to them, or something going on with them, that 90 percent of the other bonds don't have.

MR. MOLO: Yes.

THE COURT: And so you say, Hey, maybe I might get Scarpulla, in terms of my bonds, to interpret the settlement agreement in a way that is different because all of the other 500 trusts have taken their money in a

1	Proceedings
2	certain way.
3	MR. MOLO: You don't have to do that.
4	THE COURT: Right?
5	MR. MOLO: You don't have to do that.
6	THE COURT: No?
7	MR. MOLO: No. You don't have to do that at
8	all. In fact, you should interpret the settlement
9	agreement just as its written, just as Jason Kravitt said
10	it, on the senior-most tranche, or, "the tranches who
11	were more senior who suffered the losses get the cash
12	first." So that's what the settlement agreement says and
13	that's what was intended.
14	These particular PSAs, you're absolutely right.
15	The language in these PSAs is a little bit different,
16	although significantly so when we are talking about the
17	amount of money at stake in this particular situation,
18	but it's a little bit different
19	THE COURT: And that's why you bought those
20	bonds.
21	MR. MOLO: Correct.
22	THE COURT: Correct?
23	MR. MOLO: Absolutely.
24	THE COURT: That's my whole point. You bought
25	the bonds thinking, Maybe I'm going to get come into
26	court and convince this Court that my interpretation

between the PSA and the settlement agreement gets me something that the other 500 trusts, which have a little bit different language, don't get.

MR. MOLO: Well, a little bit different language is, we know in the world we live in, can make a great deal of difference.

THE COURT: I don't know that that makes a difference in a commercially reasonable -- whether a interpretation of the settlement agreement is commercially reasonable as a whole.

MR. MOLO: Okay. Well, may I?

THE COURT: Yes.

MR. MOLO: Okay. All right.

THE COURT: Yes.

MR. MOLO: So I want to address two points. I'm going to talk about the language in one second. before that, what the super seniors have here in over collateralization, put very plainly, is credit enhancement; right? These are bonds that were safer than people further down the chain because of that feature of over collateralization; right? That was negotiated among these parties in the various deals that What the senior support certificate holders were done. had, again, because, you know, they're at the top, you I can't tell you right now what the interest rates know.

Vanessa Miller Senior Court Reporter

were for each of these bonds, but, obviously, you know, they're getting some kind of protection here. The protection they got was the specific language in the waterfall here that wasn't present in these other deals, just as you said. I agree, Judge. This is language that is different.

Now, you asked me is it commercially reasonable. Absolutely it's commercially reasonable, because if you're going to buy that bond, and you're subordinated, there's no question you're subordinated to the super senior. If you're subordinated, you want to still get whatever protection you can get. And, you know, between Sidley Austin, McKee Nelson, Thacher Proffitt and all those underwriters in these 14 deals, with whoever the original bondholders were, that negotiation occurred and. This was the credit enhancement that number two in the debt stack get.

THE COURT: But that is after the settlement agreement. So you can --

MR. MOLO: No. This was here before the settlement agreement. This is here when these parties decided, no, the settlement agreement says what it says, what these parties decided is reflected in the PSA. I'm not --

THE COURT: I have to say, when I looked back

and looked at the transcript and I asked Judge Kapnick this question, did anyone suggest, while these days and days and days of hearings, that this is the way any part of the settlement was going to be paid out, she said no. And if you can point to me testimony during the hearing of the settlement agreement where this -- the way that specifically now you're asking me to interpret the settlement agreement would be, I'd love to read that. That would be very helpful.

I mean, but I'm telling you MR. MOLO: Sure. right now what was designed here -- and I'm going to get the language, okay. We'll go to the language of the PSA. What was designed in these bonds. You're absolutely We bought these afterwards. This wasn't right. something that we came up with. This was something that at the time these deals closed between 2005 and 2007, these sophisticated parties, advised by top Wall Street lawyers, came to the conclusion that the super seniors would get credit enhancement through over collateralization and the senior support certificates would get credit support, being number two in the chain, they would get credit support by the language in the waterfall --

THE COURT: Again, I would like you to point me out anywhere, in the entirety of the settlement agreement

1	Proceedings
2	testimony, where anyone said, By the way, Judge Kapnick,
3	with respect to some of these trusts, the senior over
4	collateralized will not get paid before the junior
5	bondholders. I didn't see that anywhere.
6	MR. MOLO: Well
7	THE COURT: And that leads me to believe that
8	no one anticipated that. If you have testimony, and I
9	won't hold you to it today, but if you have testimony to
10	that effect, I would love to see it.
11	MR. MOLO: Okay. But the question is
12	THE COURT: Because my job here is not about
13	what happened between you in 2005
14	MR. MOLO: I understand.
15	THE COURT: and 2007. Mine is a settlement
16	agreement was reached; the parties negotiated that
17	settlement agreement; they intended to have a certain
18	effect. And so what I need to do is to put that intent
19	in place.
20	MR. MOLO: Agreed.
21	And the number one intent I mean, in addition
22	to what Mr. Kravitt said, is apply the PSAs as written
23	THE COURT: No.
24	MR. MOLO: It says that.
25	THE COURT: That is not correct.
26	MR. MOLO: It says

#### Proceedings 1 2 THE COURT: It does not say -- the settlement agreement does not say apply it as -- it says that to the 3 extent there is inconsistency, but that was a different 4 5 thing. This was not inconsistent. And it 6 MR. MOLO: was fully intended. Again --7 8 THE COURT: Yes. -- allow me for one second. 9 MR. MOLO: 10 THE COURT: Yes. All right. Whether or not, 11 I'm going to let you go for a while. 12 Okay. You can do whatever you want. MR. MOLO: 13 I want to make sure any question that you have is 14 answered. 15 Settlement Agreement 3(d), it says "Nothing Believe me. I've read this 16 THE COURT: 17 settlement agreement more times than I wish I had. 18 Believe me when I tell you. "Nothing is intended or shall be 19 MR. MOLO: 20 construed" 21 THE COURT: No, no. I tell you lawyers, lawyers, lawyers. Only lawyers can come up with an 22 23 agreement like that. 24 So, yes. Go ahead. 25 MR. MOLO: But the agreement does say that "nothing is intended or shall be construed to amend the 26

governing agreements"; right?

THE COURT: Right. Yes.

MR. MOLO: Now, Judge, again, this is highly negotiated. And, I mean, it may have been required, this waterfall provision, in order to get the triple-A rating on these specific deals, that's a possibility here too. But when you say, Well, how could anyone have anticipated it, right? And res adjudicata obviously raises -- it bars any issue that was raised or could have been raised; right?

In 2010, eight months before the settlement agreement was signed, Credit-Suisse issued an analyst report telling the world that this trustee, BONY, actually paid, as we're saying it should be paid, through the waterfall in this way, all right, on one of the very 14 bonds at issue. So there was no mystery about this. This wasn't some little secret gotcha. It was a provision that was negotiated and it was a provision that was tested.

In fact, frankly, I don't even think the trustee had to even come here with this proceeding. I think the trustee was pushed because these other big investors were barking at the trustee saying, You can't let this happen, I've got to come to court and have this straightened out. The trustee has done exactly what we're asking be done in

the past. So now, if, in fact, a different distribution through the waterfall occurred, it's going to be contrary to the only course of dealing that's occurred on these bonds through this PSA.

THE COURT: I think that the settlement agreement makes clear that there are things that are in the bonds that are no longer applicable. That's the whole point of the settlement agreement.

MR. MOLO: It doesn't --

THE COURT: It does. For example, how we treat certain money is set forth in the settlement agreement and it's set forth differently than some of the PSAs.

That's what the settlement agreement was there for.

MR. MOLO: But the waterfall provision is followup --

THE COURT: Okay.

MR. MOLO: -- and the way this PSA works is that the settlement proceeds, these are called subsequent recoveries under the settlement agreement, are considered available funds. The available funds under this waterfall first go to pay interest; second, they pay principal up to a principal distribution amount, that's an amount that's calculated. When we were talking about over collateralization, that's not -- I mean, that wasn't something that moved from month to month. The principal

distribution amount is the key amount. And then, to the most senior tranches of bonds with losses, most senior tranches of bonds.

And so the difference here between these other over collateralization trusts that's already been resolved, that those are settled. And these are that the balance, the distribution, the cap, on what the super seniors get is calculated before the balances get written up. You see it uses the term — this PSA uses the term — "immediately prior and not the balance on the distribution date."

And if you'll forgive the basicness of these graphics, this is just being done for illustrative purposes. I just want to show you. This is the way the waterfall would normally work when the bonds -- people were paying their mortgages and the bonds would work. The senior holders would get what they get, and this would be the principal distribution, this red line here. So the seniors would get what they get. Then, we, the senior support certificates, would get what we get. And all way on down the line, all the way down the chart that I showed.

Now, what happened was in the crux, when people stopped paying their mortgages, okay, or people stopped paying the mortgages that caused the crisis, but the

mortgages stopped getting paid. So what was traditionally the revenue into the trust dries up.

24

25

26

Who gets paid first? Of course, the super seniors. They're getting their principal distribution; they're getting in interest. And, we, the senior support holders are taking a loss. And these other losses, the other tranches all the way down the road, they're completely out. We were at least getting something, okay.

So what the settlement agreement does is it treats the payment as a subsequent recovery, okay, and that subsequent recovery comes in. And just like Jason Kravitt said, I just asked you to do what Jason Kravitt said should be done. The senior-most bonds with losses get paid first. And that would be the super seniors. To the extent that they have losses, their losses -- and we're talking across 14 trusts that would make it a very broad generalization. But, I mean, it might be three percent, four percent, or something like that. Our bonds are devalued probably by 35 percent or so. Okay. So they get whatever they get coming to them. We get then, being the senior-most bond that suffered losses, right? The senior-most tranches that suffered losses. tranche one, tranche two. If there's no more to make up their losses and there isn't enough for us to hit our

#### Proceedings 1 2 principal distribution amount, you know. We're still going to go from maybe 35 percent losses, if this pays 3 4 as we're saying it should pay and as the trustee paid in 2010, we're still going to be 25 percent. I mean, there 5 6 are still going to be significant losses that these bonds will have experienced. And then it ends. 7 8 So this is the system. And it makes sense; 9 right? I mean, it makes perfect --10 THE COURT: No. It doesn't really make sense to me that you paid very little and you get a lot. 11 12 doesn't make sense. That's a completely different issue. 13 MR. MOLO: That issue --14 15 THE COURT: That doesn't make sense to me. Then why would anyone agree to settle that way? 16 17 Because what we paid --MR. MOLO: 18 THE COURT: Why would AIG and BlackRock and 19 AEGON, who are there at the time of the settlement, agree to that scheme? 20 21 MR. MOLO: Because what we paid for the bonds 22 is wholly irrelevant. 23 THE COURT: Only if I interpret it this Okay. 24 way; right? 25 MR. MOLO: No, no. Not at all. Because all I'm asking you to do is interpret the settlement 26

agreement as written and then enforce the PSA as it is -THE COURT: So the one thing I asked you, why
were the people that negotiated this settlement
agreement, who have the most to lose, agree to that

6 scheme at the time?

MR. MOLO: Because -- I don't know why. AIG -THE COURT: Well, okay. I have to figure out
why, because I have to interpret the settlement --

MR. MOLO: No, no. You don't have to figure out why --

THE COURT: I do have to figure out what the parties intended when they entered into the settlement agreement. I didn't draft the settlement agreement, nor did your clients. Your clients weren't even around when it came to being negotiated and drafted.

MR. MOLO: Because --

THE COURT: Sir, can you sit down please?

Hold on. Let's go off the record.

(Discussion held off the record.)

THE COURT: All right. So I'm just going to ask you, my court officer is instructed not to let anyone in the well. I mean, it's just a safety issue.

Okay. So what I was saying is that the question of what is irrelevant -- because what the Court is doing and what the Court should be doing is looking first to

Vanessa Miller Senior Court Reporter

the face of the agreement; right? And the agreement -- when I say "the agreement", it's really two agreements here; it's the settlement agreement and then it's the PSA. And the fact that this bond, again, and these 14 bonds had this waterfall provision, was not a secret. These are smart and sophisticated parties --

THE COURT: I know. That's what I'm saying. So the people who negotiated the settlement agreement, which is not verified --

MR. MOLO: Right.

THE COURT: -- must have known that -- and I cannot imagine that they would have intended this result in negotiating the settlement agreement. Why would they?

MR. MOLO: Well, the reason that they would do that is because when you go back to the issue of where these folks were, that high, senior-most bonds, senior-most tranches who've suffered losses. Jason Kravitt didn't say, Our intention is that the super senior be made 100 percent whole and that any over collateralization that they may have enjoined would persist --

THE COURT: And he certainly didn't say that in a big payout like this, the junior would get way more than the more senior bondholders.

MR. MOLO: No. He said that the senior-most

25

26

bonds with losses. And in this situation, we are, to a small extent, the super seniors, but we are the senior-most bond. And that was something that was negotiated by those five underwriters, those three law firms in 14 different deals.

Now, I don't know that my friend, Mr. Goldstein, actually read the affidavit that we supplied because the affidavits -- and you're asking about commercial reasonableness, right? So one of them was from somebody that was a senior trader, a person who had done a number of other things related to RMBS. The other gentleman, Aronoff is a lawyer, Cornell-trained lawyer, who started out at Thacher Proffitt, who then went to Paine Webber, who worked for a bond insurer, had extraordinary experience, extraordinary experience in this area. to the extent the Court -- this is what Aronoff said in his affidavit: "I have over 30 years experience analyzing and designing payment priority, waterfalls, in RMBS transactions." He said, "in payment priority that limits certain cash flow distributions to senior bonds is not at all unusual or unique." He goes onto say that, "the reason that you would do that is to make the less-senior bond more marketable to investors. credit enhancement."

THE COURT: This is assuming that there's no

settlement agreement. That's what I'm saying to you.

That the settlement agreement -- it's almost like you're pretending that that didn't occur.

MR. MOLO: Not at all, because --

THE COURT: But you are, because when the settlement agreement comes in, it is not what the parties intended under the original trust agreement. It's how the parties that settled the loss under these trust agreements agreed and intended for the money to be paid out. That's what I'm here to determine.

MR. MOLO: Right.

THE COURT: Not what the people in 2005 or 2007 agreed upon.

MR. MOLO: Right.

And what they said, the parties in the settlement agreement, was that, "nothing in the settlement agreement is intended or shall be construed to amend the governing agreement."

THE COURT: Right. But amending it doesn't -interpreting how to pay out money, I said this at the
last hearing, is not amending the settlement agreement. I
can tell you that that is where I'm heading.

MR. MOLO: It says you treat it as a subsequent recovery, right? That's a designed term in these agreements --

In the settlement agreement, it is

THE COURT:

said that they're going to be treated as a subsequent --MR. MOLO: Correct. And this is how subsequent recoveries work under this waterfall in these bonds. for good reason, because this is a form of credit enhancement to the second-most senior bond tranche of So it makes perfect sense. It's commercially reasonable. And they've failed to say -- to provide one piece of evidence that says it's commercially unreasonable other than, you know, we want more money and we want to be over collateralized to --I think they put in a lot of THE COURT: information. Not on the point of commercial MR. MOLO: reasonableness. And let's talk about Intex. Okay.

Intex -- when I got involved in this case, as your Honor may recall, Intex was -- we were hotly contesting whether Intex should be deposed --

THE COURT: We were.

MR. MOLO: -- whether we should go to

23 Massachusetts.

20

21

22

23

24

25

26

And I had to ask myself the same thing. Just getting involved in the case, I thought, Wow, this must be really an important thing. And we almost went to Massachusetts for a motion to compel and we got delayed several times and we had a phone conference. And at the end of the day, finally, finally, the skies parted and we were marching forward to have the Intex deposition taken.

And what happened? That backfired on Mr. Goldstein, completely backfired. Instead of having this robust deposition where we were going to go forward and depose the President of Intex and find out what Intex means, he comes forward sheepishly with this affidavit. And the affidavit -- you might remember another phone call we had about whether the deposition was going I said, you know, Judge, I haven't seen the affidavit, and, you said, Well, take a look at it and let me know whether there's something there that's going to cause you to take the deposition a little more. did. And I said, why would I ever want to depose this And here's why: man.

First of all, you have to understand what Intex is: Intex is a modeling tool. All right. When a bank is buying bonds like these and it wants to price them and have its own forecast and modeling, it often has to have that modeling system served by or blessed by regulators.

1

2

3

4

13

14

15

16

17

18

19

20

21

22

23

24

25

26

That's how -- this is not what we're talking about here.

This is a software provider -- I don't know this, but my guess is given the holdings that BlackRock and AIG have in this sort of security that they're probably two of the biggest customers of Intex.

And what could they get Mr. Intex to say? is what they got him to say, Intex: They got him to say that -- can we put up the Intex? Yeah, okay. what he says, George Jigarjian, the President of Intex, on behalf of Intex says, "Intex provides no assurances as to how a trustee...will or should pay on any given deal."; that, "these models did not reflect Intex's opinion or belief that either the Standard Intex Model or one of the other models is the correct or best way to In other words, he said, it's a modeling tool. And we have -- what they call toggles, you know, these different ways that you can configure it. And then there's the quote, "Standard Intex Model", which happened to be the first one which happened to coincide -- I believe it first shows up in 2015 after AIG buys these bonds.

So they don't say -- because I would've asked this at the deposition, you know, Did AIG call you up and ask you about, you know, this modeling. And we never got that. Instead, we got the affidavit. I didn't need to

#### Proceedings 1 2 take the deposition because I got the man who is Mr. 3 Intex saying, We provide no assurances as to how a 4 trustee will or should pay. And, by the way, Intex has 5 never actually -- there's never been a payment consistent with the Intex model. 6 Well, the Standard Intex Method 7 THE COURT: 8 doesn't reflect the way that you're asking me to; 9 correct? 10 MR. MOLO: Correct. Absolutely. Because it's 11 wrong. 12 THE COURT: Does not --13 MR. MOLO: Because it's wrong. Well, that's your opinion. 14 THE COURT: 15 they're not saying -- he's not saying, And by the way, 16 the Standard Intex Method is wrong. He's not saying that 17 at all. 18 MR. MOLO: No. He's saying it is what it is. THE COURT: It is what it is. 19 It is a model. 20 MR. MOLO: 21 THE COURT: And that is absolutely a way to pay 22 under your trust. 23 Which, it would be a way --MR. MOLO: 24 THE COURT: Is that correct? That's correct. 25 I could take the Standard Intex Method, apply them to

your trust and it would result in payment the way that

26

AIG and BlackRock and AEGON are asking you to pay;

correct?

MR. MOLO: Or they can ask us to load up a car with cash --

THE COURT: I'm just asking if that is a true statement? Yes? It is a true statement.

MR. MOLO: If they want to pay according to the, quote, "Standard Intex Model" --

THE COURT: Yes.

MR. MOLO: -- which is wrong, by the way. But, more importantly, I'll come to that in a second. More importantly, to pay it that way, it's like if the trustee had a car loaded up with this cash and rolled down the windows and drove on the FDR and have the cash goes elsewhere. It doesn't matter. What they would like to do is rewrite the PSAs to follow the Standard Intex Model.

If I could have Chart 11 up, please. The Standard Intex Model violates the settlement agreement and the PSA. Settlement Agreement 3(d) requires that you follow the PSAs and the trustee shall distribute in accordance with the distribution provisions of the PSAs. The PSAs say you compute the principal distribution amount before you write up the certificate balances and the Standard Intex Model says you compute the principal

distribution amount after writing up the certificate balances. So Intex gets it wrong to the extent that you can even rely on it.

What seems to be overlooked here, and what AIG and BlackRock and no one else has addressed, the trustee has actually applied the waterfall payment method that we are urging the Court to apply --

THE COURT: Prior to the settlement agreement.

MR. MOLO: Correct.

THE COURT: Correct. So, again, that is prior to the settlement agreement.

MR. MOLO: Which would have the settlement agreement modifying the terms of the PSA.

THE COURT: All the settlement agreement says is that it would not amend the PSAs.

MR. MOLO: Right. And this would be a substantial amendment.

THE COURT: And I am unwilling, at this point -- and I may not agree with you that this is an amendment of distributing money. I'm not making a decision today. But I am having a difficult time with the prospect that determining how to pay the money is an amendment to the PSA under the settlement agreement; that is my issue. And it has always been my issue. It's my issue with the other --

1	Proceedings
2	MR. MOLO: Sure.
3	THE COURT: group of trusts who want me to
4	pay them above senior certificate holders too.
5	MR. MOLO: Right.
6	THE COURT: I don't think anyone
7	MR. MOLO: Okay.
8	THE COURT: frankly, I don't think anyone,
9	at the time the settlement agreement was negotiated and
10	days and days of testimony about it, anticipated that
11	anyone would come in and say what you are saying now.
12	And so you cannot ignore that. The settlement agreement
13	intervened between this, the PSA and payment today. And
14	I feel like you're not except for saying to me that
15	the settlement agreement can't change this, and, I agree,
16	you can't amend your PSA.
17	MR. MOLO: Right.
18	THE COURT: But my problem with that is that I
19	don't believe that determining how to pay what is termed
20	money under the settle agreement necessarily is an
21	amendment to the PSAs.
22	MR. MOLO: Okay. Going back a bit. In our
23	conversation this afternoon
24	THE COURT: I mean, you know, let me say again,
25	these are difficult issues. And I'm raising them with
26	you now for a conversation. I have not made up my mind.

1	Proceedings
2	MR. MOLO: I agree. I'm confident you're going
3	to
4	THE COURT: I'm listening to what you're
5	saying. I promise you that I'm listening with both ears.
6	MR. MOLO: And I don't doubt it for a minute.
7	THE COURT: All right.
8	MR. MOLO: Going back three steps, right, is,
9	as I said, this structure and it's not me saying it,
10	it's Aronoff, it's our other experts saying, This is not
11	just one-off unicorn structure. This is a structure that
12	is there for a purpose, okay. And so it was on the radar
13	screen. And, in fact
14	THE COURT: So then show me some testimony.
15	MR. MOLO: I'm showing that in 2010, there is
16	a
17	THE COURT: I'm asking you, again, if you think
18	that the parties who negotiated this settlement agreement
19	anticipated and believed that this is how the money was
20	going to be distributed with respect to these trusts,
21	show me some testimony. There were 65 days of testimony,
22	maybe 64. I don't recall. It was around
23	MR. MOLO: It was a lot.
24	THE COURT: It was a lot. Show me some
25	testimony where the parties who actually negotiated this

settlement said, Yeah, and under at least 17 trusts of

26

#### Proceedings 1 2 several hundred million dollars, this is how it's going 3 I didn't see it. And I, again, invite you 4 to --5 MR. MOLO: Okay. And you know what? I'm going to go back through the transcript after I leave here. 6 THE COURT: 7 Good. 8 MR. MOLO: But I don't know that we need to go 9 back further than --10 THE COURT: I think you do because it is the You cannot ignore the settlement agreement to 11 intent. 12 the extent that you are. I don't disagree with you. 13 MR. MOLO: But what does Kravitt's testimony mean? 14 What 15 does his statement mean? If we can go back to 16 the -- here. This one. What does it mean? 17 THE COURT: Did he put that up when he was 18 testifying? 19 MR. MOLO: He didn't put it up. No. 20 THE COURT: That's my whole point. That's you 21 putting that demonstrative up saying, Here's how I'd like 22 the settlement agreement to be interpreted. But I would 23 like to know what the parties, at the time, anticipated. 24 Well, when he said the senior-most MR. MOLO: 25 tranches, right, that experienced losses, that's what happens here with what we're talking about. 26 The

1	Proceedings
2	senior-most tranches.
3	THE COURT: Okay.
4	MR. MOLO: I don't know how much clearer it can
5	be. We, the senior support holders, suffered significant
6	loss. And we're not talking about compensating all these
7	people down here. We're saying, Take these proceeds and
8	apply them first to the seniors
9	THE COURT: So if I apply these proceeds, how
10	much would the senior holders get and how much will the
11	senior support holders get?
12	MR. MOLO: The difference I can't tell you
13	the exact dollars.
14	THE COURT: Just give me a ballpark.
15	MR. MOLO: May I talk to my client for one
16	second?
17	THE COURT: Of course.
18	(Pause in proceedings.)
19	THE COURT: I don't think it should be that
20	difficult. I'm sure you've been thinking about this and
21	you have these numbers.
22	MR. MOLO: I was expressing percentages, by the
23	way.
24	THE COURT: No. I'm talking about a dollar
25	number. How much of the payment would go to the senior
26	holders and how much would go to the senior support

1	Proceedings
2	holders? I won't hold you to a penny.
3	MR. MOLO: We're talking about across all
4	THE COURT: Approximately.
5	MR. MOLO: all of this in these trusts, not
6	what our
7	THE COURT: Yes.
8	MR. MOLO: holders would get? I mean, the
9	difference is several hundred million dollars.
10	THE COURT: Well, let me hear.
11	So if the difference is, the second layer will
12	get several hundred million dollars more than the
13	more-senior level; is that what you're telling me?
14	MR. MOLO: I'm saying the senior-most tranche
15	with losses.
16	THE COURT: Okay. So here, let me make it
17	easier.
18	MR. MOLO: Okay.
19	THE COURT: The senior support holders
20	MR. MOLO: Right.
21	THE COURT: a junior class
22	MR. MOLO: Right.
23	THE COURT: of bondholders
24	MR. MOLO: Correct.
25	THE COURT: will get several hundred million
26	dollars more than the senior holders?

1	Proceedings
2	MR. MOLO: Correct.
3	THE COURT: The holders of more senior bonds,
4	if I interpret
5	MR. MOLO: Correct.
6	THE COURT: the settlement agreement your
7	way.
8	MR. MOLO: But they're not experiencing the
9	losses.
10	THE COURT: I just
11	MR. MOLO: That's the difference.
12	THE COURT: I'm asking you if that's the bottom
13	line.
14	MR. MOLO: Yes.
15	THE COURT: Okay.
16	MR. MOLO: But because it was intended by the
17	settlement agreement, because it was intended by the PSA,
18	all right.
19	THE COURT: I haven't seen it intended by the
20	settlement agreement. You ma be have it intended by the
21	PSA. I'm not taking any position on that right now.
22	MR. MOLO: Okay.
23	THE COURT: But can I say I haven't seen
24	anything, which is why I keep asking you show me some
25	testimony, show me something from the people at the time
26	the settlement agreement was negotiated, because I

haven't seen anything at the time the settlement agreement was negotiated, or the testimony afterwards, that would indicate that the parties intended that the senior support holders, a junior class of bondholders, would receive from the settlement proceeds several hundred million dollars more than the more-senior bondholder.

MR. MOLO: Okay.

THE COURT: That is what I'm saying.

MR. MOLO: Can I offer you a construct to think

about it --

THE COURT: Sure.

MR. MOLO: -- that would make it more acceptable, perhaps? No. The reason I'm saying that is because what I'm hearing from you, Judge, is that you're saying, How could it possibly be that these junior people are getting money and the senior people --

THE COURT: I'm not saying that so much is how could it possibly be that the people who negotiated the settlement agreement --

MR. MOLO: Okay.

THE COURT: -- wanted that to occur. That is what I'm saying. I can't imagine that anyone would actually negotiate a settlement agreement, someone who was in the best and the toughest position -- I mean, the

senior holders were driving this truck. And I can't imagine, at the time they were negotiating the settlement, they said, And by the way, I'll take several hundred million dollars less than the less senior support holders, of which your clients didn't even hold at the time.

MR. MOLO: Okay. But they did get what they were entitled to. They got what they were entitled to. They get the subsequent recovery to the extent that they experienced the losses, then it flows down to the senior-most tranches.

Now, they could've written it, right, they could've written it to say, Only the senior-most tranche shall recover ever. And there is some language in there about very junior classes that are completely wiped out not getting anything. There's language to that effect in various parties, so they could've done that. They thought about that sort of concept. But, instead, what Kravitt said is, the senior-most tranches --

THE COURT: I don't think that's true because your client wasn't even there when the settlement agreement was negotiated. How could you make that representation? You don't know what the seniors bondholders negotiated.

MR. MOLO: No. The trustee's counsel.

#### Proceedings 1 2 THE COURT: Oh. I'm sorry. Okay. 3 MR. MOLO: He's the lead negotiator for the 4 trustee. 5 THE COURT: All right. All right. If anyone is going to speak with sort 6 MR. MOLO: of the most pure voice as to what was intended, you would 7 8 think it would be the lead negotiator for the trustee. And he's the one saying, Here's what -- through the back 9 and forth of that -- and, by the way, you know, if they 10 brought the wrong bonds, they bought these bonds at the 11 12 time, they'd be saying, of course that was the case. These bonds were bought after as well. 13 THE COURT: No, no. But they were holders at 14 15 the time. 16 MR. MOLO: They were holders, certainly. 17 THE COURT: And they were at the table 18 negotiating hard during this settlement agreement. 19 MR. MOLO: Which is why it's res adjudicata 20 because it wasn't raised in negotiation and it wasn't 21 raised at any point --And so then if that's -- then I 22 THE COURT: 23 should accept the interpretation of the people who are 24 there at the time that the settlement was negotiated. 25 MR. MOLO: No. You should accept the language

in the documents.

26

THE COURT: Well, here's the problem: If the two sides had a disagreement about what the documents say, and there is a side that is there at the time the document are negotiated, and there's a side that wasn't --

MR. MOLO: We only get to that if they show there was a absurdity. And there is no absurdity when a triple-A rated bondholder --

THE COURT: Okay.

MR. MOLO: -- is compensated for losses. And the second-highest bondholder, in the whole series of debt holders, is compensated. It's a lost compensation provision that is in this PSA.

And as I said, don't take my word for it.

Aronoff says in his affidavit and our other experts say in their affidavit say that this is something that is contemplated sometimes. And when these parties are going back and forth, like we talked about before, you know, they have this level of intensity and you've got a group of investors saying, You know what, I'll get in on that deal, but if I want to get in that deal, the super seniors have credit support, they're getting over collateralization, I want my credit support. Now credit support can take a lot of different forms, but in these deals --

THE COURT: Yes. But we're not talking about just that deal. I keep saying this to you is that deal plus the settlement agreement.

MR. MOLO: I agree.

THE COURT: No. I feel that you want me to just take the deal as the deal, but it's not the deal as the deal. It's the deal as the settlement agreement.

MR. MOLO: I agree. And the settlement agreement, the settlement proceeds are treated as subsequent recoveries and then considered under the PSAs available funds, and this is how you pay available funds under this agreement. It's not a hundred percent the same in every PSA, just as many things are not because they're negotiated.

THE COURT: Okay.

MR. MOLO: So, I mean -- and, again, the difference in the language that we talked about, and this is the result -- which is not, you know, it's not like some great unfairness here and it's not as if --

THE COURT: But wait a second. Let's talk about that.

MR. MOLO: Sure.

THE COURT: At the end of the day, are you going to get more money than the senior holders?

MR. MOLO: I'm not -- we are going to get more

Vanessa Miller Senior Court Reporter

2 cash.

THE COURT: Yeah. Okay. Well, cash is money; right? It's not like you can hold a worthless security. But you are actually going to get more --

MR. MOLO: But our losses are going to go, again, it's a very broad generalization, from around 35 percent to 25 percent. Their losses are going to be probably around two percent. All right.

THE COURT: Okay. But let me say that, at the end of the day, you will get paid more on your bonds than the senior --

MR. MOLO: As the contract calls for.

THE COURT: -- is that correct?

MR. MOLO: Correct.

THE COURT: No. As the way that you want me to interpret the settlement agreement.

MR. MOLO: Well, I mean --

THE COURT: Yes. Okay.

MR. MOLO: Yes. And the only way, by the way, that we rewrite it, the only way we get to where you're saying, well, we should go back and look and see what they said and what they thought, is if this would somehow be rendered an absurdity, that the contract would somehow be absurd. And it is not absurd; it's something that made these bonds more marketable; it's something that got

them that a triple-A credit rating; it's something that, in these highly-negotiated transactions, all right, was put in there for a reason. And that negotiation that occurred from the settlement agreement said treated as a recovery. And so, whatever that means in each PSA, not a subsequent recovery, only if it means that the super seniors get even further over collateralized and the negotiated for or the classic negotiated for, this other form of credit support, doesn't get that.

THE COURT: It definitely doesn't say that. I agree.

MR. MOLO: And, no. And they could've done that, though, and said -- they could've done that because they do it in certain respects with other things.

THE COURT: Okay. Anything else you want to talk about?

MR. MOLO: If you're not convinced yet --

THE COURT: I mean --

MR. MOLO: How much time do you have?

THE COURT: This is a very difficult --

MR. MOLO: I don't disagree with you. I don't disagree with you.

Let me just address one other thing: The date of the payment, you know. The trustee received the funds on February 10th. The settlement agreement requires

Vanessa Miller Senior Court Reporter

## Proceedings 1 2 distribution on the next available distribution date, which is February 25th. 3 These proceeds were filed, even though there was this prior course of dealing in 2010. 4 And because of these other holders pushing, this 5 6 proceeding is what it is. We had to go through the whole Intex brouhaha and we wound up -- that went over like a 7 8 lead balloon. And so we've been delayed here. 9 And as we explained before, \$400,000 a month on one bond alone, AIG benefits by this delay. So we would 10 ask that the fair thing, this is an equitable proceeding, 11 12 is to go back and treat it nunc pro tunc. 13 I have to say, Judge Friedman did THE COURT: say something --14 15 MR. MOLO: You know what was different there? 16 The settlement proceeds had not yet been received by the 17 trustee. 18 THE COURT: Yeah, but --There's a difference. 19 MR. MOLO: 20 THE COURT: But she made sort of a legal point 21 that I don't disagree with. So I'll go back and look. 22 MR. MOLO: Fine. But there is a difference. 23 THE COURT: But I'm not going to -- on the 24 legal point, I'm not going to --

Vanessa Miller Senior Court Reporter

I appreciate you indulging me.

Your Honor, may I respond to

MR. MOLO:

MR. GOLDSTEIN:

25

26

2 one --

THE COURT: Well, I want to hear from someone who I haven't heard from.

MR. WARE: Your Honor, Michael Ware, Mayer Brown, for the trustee.

As the Court knows, we are completely, completely neutral on the merits of this interesting dispute, although we are glad we filed the case rather than let this all happen when one of these guys was suing --

THE COURT: That is so true.

So, I mean, but you're there. You're the negotiator. Do you recall any testimony at the hearing about how -- do you recall anyone testifying that this is how any of the money was going to be paid out?

MR. WARE: I didn't attend the whole trial -THE COURT: Right. But do you recall anyone
putting in testimony to that effect?

MR. WARE: Well, I will say that Section 3(d)(1) of the settlement agreement is really pretty clear on a couple of things. And this is actually why I wanted to speak now because -- and I'll hit that point in a second on this record date issue. There is a very comprehensive -- I thought this issue had dropped out of the case, which is why we didn't put papers in.

Vanessa Miller Senior Court Reporter

My friend, Mr. Molo, said that the trustee received the money in February. That's not the relevant test. The relevant test --

THE COURT: What does the settlement agreement say?

MR. WARE: Well, the relevant test is in the settlement agreement, and this is Section 3(d)(1) that, "after the allocable share for each covered trust has been deposited into the certificate account or collection account for each covered trust, then the mechanism for payment starts."

When we came to you in February --

THE COURT: And I put the money in treasuries --

MR. WARE: You put the money in treasuries and it never hit those accounts.

THE COURT: It hasn't hit the accounts. I agree.

MR. WARE: That is the first part, the first decretal paragraph of the order to show cause: "As an interim measure necessary to permit the Court to direct a trustee on the distribution of the allocable shares, the trustee is directed to enter into the escrow agreement" -- skipping words here, "and to deposit the settlement payment into escrow before the settlement

payment is deposited into the certificate accounts or collection accounts."

So what we did in February, as lawyers for the bank, and then the Court approved, was we stopped that process from happening so that to predetermine this exact argument. And I thought it had dropped out of the case until I saw counsel's papers over the weekend.

Let me answer the question put to me: I wasn't there at every day of the trial and partners of mine tried the case, but I know the answer. Section 3(d)(1) of the settlement agreement provides that, "once the allocable shares has hit those accounts, the trustee shall distribute it to investors in accordance with the distribution provisions of the governing agreements." So that it was our understanding, then and now, that there could be different results obtaining a different trusts.

THE COURT: So there could be -- and that was the understanding at the time, that some senior bondholders were not going to get paid under the junior bond, whatever the trusts were?

MR. WARE: The only break that was put on that in the settlement agreement is at the very bottom of Section 3(d)(1), which does specify a class of securities so low, that no matter what, they get nothing.

THE COURT: So at the time, you're saying that

### Proceedings 1 2 people anticipated that the senior-most bondholders do 3 not get paid first. 4 MR. WARE: I won't put it that way. But the last sentence of Section 3(d)(1) provides that, blahdee 5 6 blah, blah, skipping words, "distribution of allocable 7 shares in a particular covered trust governed would 8 result" -- skip, skip, "in money being payable to class of REMIC residual interest", then there's a fix to stop 9 So those are the lowest. 10 that. These are -- with these common law PSAS are 11 12 basically all equity rather than debt, but most of them look like debt. This is the one that looks like equity. 13 And so the settlement agreement does contemplate what 14 15 classes other than the highest most might get some. 16 And it draws the line below which they won't go --17 Will get some or will get more? THE COURT: 18 MR. WARE: I --THE COURT: Depending on whatever the PSA --19 Whatever the PSA or the indenture 20 MR. WARE: said. 21 22 THE COURT: Okay. So that is very helpful. 23 Thank you. 24 I second what Mr. Ware said. MR. MOLO:

Vanessa Miller Senior Court Reporter

Thank you.

Some demonstratives, your Honor.

MS. KLEIN:

THE COURT:

25

26

1	Proceedings
2	(Handing.)
3	MS. KLEIN: I did not hire Mr. Molo.
4	Your Honor, Gail Klein from Goldsmith for Center
5	Court. Center Court is a senior support certificate
6	holder and Center Court was there at the time and owned
7	its bonds, even though we did not appear in the Article
8	77 proceeding. And I am here today to close whatever
9	loop Tilden and Prosiris claim that there is.
10	I first want to address the absurdity argument
11	because I do think that Tilden Park and Prosiris's
12	argument on how the PSAs work does produce an absurd
13	result that is highly time dependent and that's why
14	they're arguing so staunchly for the February date.
15	If you go to the 11-by-17 sheet of paper that I
16	just gave you
17	THE COURT: Yes.
18	MS. KLEIN: there are four different buckets
19	here. And the top row that you'll see is Center Court's
20	interpretation on the C
21	THE COURT: Oh, my goodness. Wait a second,
22	Counsel. I need to put my glasses on.
23	MS. KLEIN: I apologize for the size, your
24	Honor. I did the best I could.
25	THE COURT: No. Listen
26	MS. KLEIN: So the top row of this is Center

26

Court's interpretation of Group 1 of the CWALT 2005-61 Trust, which is the trust that we have alleged we own in. And the OC target for Group 1 of this trust is 1,542,918. The left side of this row is just assuming that the distribution of the allocable share of \$7.3 million comes in May of 2016, and the right side assumes that it came in May of 2012. You can see there is no difference in the principal distribution amount highlighted under the Center Court interpretation.

The next row is the Tilden and Prosiris Again, the same distribution of the \$7.3 interpretation. On the left side of this second row is assuming million. on May 2016 and the right side is assuming May 2012 and you can see the difference in the distribution that Meaning, the senior bondholders may get happens. \$925,751. But, oh my goodness, wouldn't it be great, in May of 2012 to be a 1M3 bondholder and it would be great to be a 1M1 bondholder in 2016. This is exactly the absurd result that happens and why Tilden Park and Prosiris keep saying, your Honor, set the record date earlier, because the senior tranches are incurring losses and, in fact, they're going to hit the senior certificates and the most senior certificates soon, which is why they're desperate to move this back, because that's their magic date. So here is the evidence of your

absurd result.

And the next two rows are the same thing with just the second group of the CWALT '05-61, again, demonstrating that it is magic to be a holder in a certain date. But if you interpret the PSA on a write up first pay second, which is if you have to default to the PSA we are going to demonstrate to you is the right way, the distribution to the certificate holders for the allocable shares never, ever changes depending on the date. And, therefore, that is the most fair interpretation; it is the right interpretation under the PSA; and it is uncontrovertible that what Prosiris and Tilden are seeking is an unfair windfall based upon identifying, as your Honor said, some random loophole that no one else saw, that no one intended.

If you turn with me to the deck that I put together --

THE COURT: Yes.

MS. KLEIN: -- I will demonstrate to you now how the write up first pay second is the appropriate methodology.

THE COURT: Okay.

MS. KLEIN: First of all, the settlement agreement, Section 3(d)(i) says that, "the settlement payment shall be treated as though it were a subsequent

recovery available for distribution on that distribution date." So the money comes in to the distribution account and the trustee says, Aha, it is available on the next distribution date.

If you turn the page with me to Page 2, the settlement amount or the settlement agreement says, "nothing in the subparagraphs is intended to or shall be construed to amend any governing agreements." This is why Tilden and Prosiris say the settlement agreement is wrong. You have to go to the settlement agreement. And the next sentence says, Well, if your Honor modifies Subparagraph 3(d)(i), "it shall not constitute a material change to the settlement agreement."

So if your Honor does not believe that it should follow the pay first write up second, it can, in fact, follow the PSA's plain terms and do write up first pay second, which is the most fair and reasonable. And which, by the way, we are a senior support certificate. More money goes to our friends, the super senior certificates. So we are here coming in good faith with, really, not supporting our own interests, but the interest of the right thing under --

THE COURT: And you were there at the time the settlement was negotiated.

MS. KLEIN: Our clients -- my client did own, at

the time of the settlement agreement was approved, and during the Article --

THE COURT: During the hearing.

MS. KLEIN: -- Article 77 proceeding.

THE COURT: And did anyone of those proceedings, when they were looking at that settlement agreement in intense detail, did anyone talk about the possibility of what Prosiris is talking about today?

MS. KLEIN: Your Honor --

THE COURT: And Tilden?

MS. KLEIN: I'm not aware if Center Court participated in the proceeding. I certainly did not. But I will tell you that it's fundamental to bondholders, who are the ones who are pressing the interest, that they get recovered for their losses. And Mr. Molo made a big deal about Mr. Kravitt saying the bonds that suffered Well, guess what? The loss is the fact that the trusts were stuffed with mortgages that were not as they were represented. The loss is not a Realized Loss, big "R", big "L", under the PSA. The loss is the loss of the value of your bond because, ultimately, one day, you are going to suffer a loss and not going to be made whole as the trust was intended. And so that's when, when you talk about losses, it's the loss of the value to the trust which hits the most senior bonds first and

ultimately trickles down.

So if you turn to Page 3 of the deck that I put in front of you, each month, only available funds are distributed. Each of these 17 agreements say, under Section 4.02, "on each distribution date, the available funds for distribution shall be distributed in this order of priority."

If you turn with me to Page 4, available fund includes those that are in the certificate account net of what's called the amount held for future distribution.

And I apologize for walking you through these very long contract terms --

THE COURT: No. I'm very happy, because I didn't draft this.

MS. KLEIN: So, again, you have available funds.

If you turn to Page 5 of the deck, these available funds are net of the amount held for distribution. And if you look at the definition of amount held for distribution, which is on Page 5, guess what? It includes subsequent recoveries received in the month of such distribution date. So these funds are treated as though they are subsequent recoveries available for distribution, which means they have to have previously been held for distribution while the certificates are written up. It's the only way it works.

And it's very important because you write up --

THE COURT: You're saying that that whole thing about "before" as opposed to "on" or "after" doesn't comport with what's in the settlement agreement.

MS. KLEIN: It doesn't. The funds -- now, remember, this is a one-time payment --

THE COURT: Right. I agree. It's a one-time payment --

MS. KLEIN: It's unanticipated by anyone. It's a huge amount of money. So if you treat it as it were a subsequent recovery, you assume it's going to be held for a month before it's distributed.

And during that time, if you flip the page to Page 6, that during that time, the funds and the certificate account, as of the 22nd of the month, are held for distribution while it is written up for the certificates.

And if you turn to Page 7, the advances, the reason Page 7 is of interest is that the purpose of an amount held for future distribution is to allow compensation to the master servicer because the master servicer has advances. So you get the subsequent recoveries, which are usually only about 10 or \$20,000, they go help pay the master servicers whose advanced fees, who owes them back and then they get put in while

the certificates have already been written up.

THE COURT: So why wasn't this one giant payment as opposed to -- was that the way the settlement agreement was structured at the time?

MS. KLEIN: Again, I was not a party to the negotiation, but I assume that Countrywide wanted to ameliorate its liability and make one payment.

THE COURT: And that was it.

MS. KLEIN: And be done.

THE COURT: Okay.

MS. CLIENT: Certainly, this probably could've been structured another way.

But, again, demonstrating that these subsequent recoveries are properly an amount held for distribution, if you look at the settlement agreement, which I've excerpted again on Page 8, under 3(d)(i), it says "provided, however, the master servicer shall not be entitled to receive any portion of the allocable shared distributed to any covered trust." So while a subsequent recovery generally helps first pay the master servicers, the parties agree, no, no, no that doesn't happen this time.

Moving onto Page 9, it then says, "on each distribution date, the trustee shall allocate the amount of subsequent recoveries for the loan group to increase

the class certificate balance of the certificates." Here we go to the guts of the agreement. The subsequent recoveries are in; they're being held for the next distribution date because they're not available funds. And, yet, under 4.02(j), they are written up the class certificate balances. So this is the crux of you write up first under these PSAs and then distributed second. And if you do that, in fact, what happens is the most senior bonds are compensated.

Page 10 is just similarly the application under a separate agreement, which is CWALT '06-A3.

And, again, the principal distribution amount definition, which is on Page 11, says that the principal distribution amount is the excess of the aggregate certificate balance immediately prior to the distribution date over the excess of the stated principal balance over the Group 1 target.

And then finally, your Honor, on Page 12 of the deck, again, showing --

THE COURT: This is the shrunken version of what you gave me in the larger version?

MS. KLEIN: It is. But I did want to show you that the difference is once you add the principal distribution amount --

THE COURT: Oh, okay.

MS. KLEIN: -- what happens. So that's just -- the larger page is just what happens with the allocable share.

THE COURT: Right.

MS. KLEIN: If you assume, in May of 2016, you actually are adding it into the OC target amounts, now you'll see that the principal distribution amount under the Center Court interpretation is 7.3 million, but the principal distribution amount under the Tilden Park and Prosiris interpretation is only \$1.8 million. And, again, oh, my goodness, how great it is to be a one-and-one bondholder and this most senior bondholders are in trouble.

Finally, your Honor, we do believe that this is the most appropriate methodology. We do understand the trustee's argument that you're supposed to distribute pursuant to the PSA. This is, in fact, consistent with the settlement agreement and with the parties' interpretations. If you don't find that it should be properly write up first pay second as we agreed with the other 512 trusts, of course, we are amenable to a one-time adjustment for the over collateralization because we do believe this is the way that it should work. And, in any event, we would ask that your Honor limit your ruling to the 17 trusts such that --

THE COURT: Absolutely.

Okay. Thank you very much.

I've heard from everyone. If I start with the rebuttals and sur-rebuttals and other rebuttals, we will be here till next Thursday.

So I appreciate very much everyone's very, very helpful, useful discussion today. I really need to think and take a lot of steps back. I'm going to go back. I think I have to look at the transcript of the hearing. I will see what the trial court -- I read Judge Kapnick's original decision, but I'm not really sure that either was particularly relevant to this.

But what I think what -- and here's the one thing I invite anyone to do, which is, that if anyone finds trial testimony during the first Article 77 proceeding that they think would shed light on what the parties intended the settlement agreement to mean and how it should function, if you will give me that in the next 30 days, that would be very useful and helpful to me. Please don't put in any argument. The only thing, if you are going to give me trial testimony, is a cover letter, Dear Scarpulla, here's some trial testimony, enjoy.

MS. KLEIN: Your Honor, may I ask that my demonstratives be put into the record?

THE COURT: All these demonstratives are going

1	Proceedings
2	to be a part of the record.
3	Okay. So thank you very much. I'm going to ask
4	all the parties, if they would, to get me a copy of the
5	transcript of today's hearing. When I get the
6	transcript, I'll mark the motion submitted or this part
7	of it submitted.
8	All right. Thanks very much.
9	MR. MOLO: Thank you, your Honor.
